

Regarding expansion of Low Power FM stations, I have been informed that these type of stations may take precedence over current FM translator service. I listen to K-Love radio on 91.1 in Denver Colorado. If the broadcast of this station were to be lost due to such a change, I would be extremely upset personally. The impact to community would be dramatic, as well. I know numerous families personally that listen to this station. This station supports community activities and causes such as the Denver Rescue Mission. It would be discouraging to contemplate the impact losing K-LOVE would have.

I believe spreading the gospel is extremely important to our survival as a nation, let alone as a community. K-LOVE does this in a way I can not. I am dependent upon K-LOVE to fulfill the great commission. Mankind does not truly know the disaster that would descend us if Christian broadcasting were not available.

Please note that LPFM should not receive priority over FM translator service.

Thank you.
